

# Pokemon TCG Price Update & Alerts - Execution Summary

---

## Execution Details

---

- **Date:** 2026-01-13
- **Time:** 08:14 UTC
- **Task:** Daily price update and ROI alerts check

## Results

---

### 1. Price Update (POST /api/seed)

- **Status:** ⚠️ TIMEOUT
- **Details:** The seed endpoint did not respond within 180 seconds. This may indicate:
  - Large dataset being processed
  - API endpoint performance issues
  - Network connectivity problems
- **Action Required:** Manual verification recommended to ensure prices are updating correctly

### 2. ROI Alerts Check (POST /api/alerts/notify)

- **Status:** ✅ SUCCESS
- **HTTP Status:** 200
- **Response:**

```
json
{
  "success": true,
  "checked": 0,
  "notified": 0
}
```
- **Details:**
  - Alerts checked: 0
  - Notifications sent: 0
  - No ROI thresholds were met at this time

## Summary

---

- ✅ Alerts system operational
- ⚠️ Price update endpoint timeout requires investigation
- 0 alerts triggered
- 0 email notifications sent

## Recommendations

---

1. Investigate the /api/seed endpoint timeout issue

2. Consider implementing async processing for large price updates
3. Add monitoring/logging to track seed endpoint performance
4. Verify that price data is being updated despite the timeout
